Re: Final Action Memorandum Amendment for a Time Critical Removal of PFOS- and PFOA- Contaminated Water in Residential Wells Near Fairchild Air Force Base, Washington. April 2019

Dear Mr. Wilkinson:

I have reviewed the Final Action Memorandum Amendment referenced above and found the changes acceptable. Decision criteria to evaluate future residences that may be candidates for installation of an in-home Granular Activated Carbon system versus the design and installation of a residential connection to a municipal water system is not a requirement for this document, but I recommend the Air Force develop a process to support management decisions in the future.

If you have any questions, please contact me at prestbo.kim@epa.gov or 206-553-0239.

Sincerely,

Kimberly M. Prestbo
Remedial Project Manager
